CV

TL;DR

I'm Luke: love code, love beer and **will code for beer**. I like my code how I like my beer: **finely crafted** with **fresh ingredients** and a **great aftertaste**. My favourite ingredients include **JavaScript**, **ES6**, **SASS**, **Ractive.js** and **Node.js**. You can witness the effect beer has on my code: Land Rover Accessories, Treasure Hunt and caniuseonmysite.

I'm currently working on a couple of side projects: countr and (*surprise!*) a site about beer. A few things fascinating me at the moment are **reactive programming**, **ITCSS** and **Diet.js**.

Please let me know if you stumble across a friendly team looking for a frontend developer who enjoys learning, sharing, crafting and drinking.

Portfolio CV

Take it easy, Luke :)

Experience
